I am writing to apply for the Werkstudent Operatives Risk position at secupay AG. The opportunity to gain practical experience in operational risk management within the payment industry is exactly the kind of hands-on learning I am looking for to complement my studies.

What stands out to me about secupay AG is the focus on making informed risk decisions in a real payment environment. The responsibilities described monitoring transactions, assessing risk factors, and supporting customer offboarding processes require a structured and analytical approach. I am confident that my background in software engineering, where precision and logical thinking are essential, provides a strong foundation for this work.

In my academic and project work, I have developed a methodical approach to problem-solving. I am comfortable working with data, identifying irregularities, and documenting findings clearly. These skills align well with reviewing transaction requests for anomalies and supporting risk assessments. I also have experience working independently and taking ownership of tasks, which matches the expectation of reliable and self-sufficient work.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am eager to bring my analytical skills and structured work style to your team. I have attached my CV for your review and look forward to the possibility of contributing to secupay AG.

Sincerely,

Md Shahanur Islam Shagor
