I am writing to apply for the Customer Risk Manager im Finanzsektor position at secupay AG. Your focus on holistic risk management and regulatory compliance in the financial sector is something I find genuinely interesting, and I believe my analytical approach and technical foundation can contribute to your team.

Through my professional experience as a software engineer, I have developed strong analytical and problem-solving skills that are directly applicable to risk management. I have worked extensively with SQL databases, including MySQL and PostgreSQL, for data analysis, reporting, and building data-driven systems. This technical background allows me to approach risk assessment with precision and a structured, data-oriented mindset.

In previous roles, I have taken ownership of complex projects, collaborated effectively with cross-functional teams, and communicated technical concepts clearly to non-technical stakeholders. I am comfortable working independently, taking initiative, and adapting to new challenges. These qualities align well with the responsibility of managing customer risks, conducting due diligence, and developing risk mitigation measures.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. Thank you for considering my application.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
