I am writing to apply for the SEA Manager - Google Ads position at Convact. Your agency's focus on driving measurable results for clients in the DACH region through effective Google Search, Performance Max, Shopping, and Display campaigns is impressive.

My background is in full-stack development and AI engineering, where I have built data-driven systems and optimized performance across multiple projects. I have experience with analytics, tracking, and reporting tools that are directly relevant to managing and improving campaign performance.

In my professional experience as a Web Developer, I have designed and developed scalable web applications, integrated third-party services, and implemented tracking and analytics solutions. I have worked with APIs, databases, and reporting systems to collect, analyze, and act on data, skills that translate directly to managing Google Ads accounts and optimizing campaign strategies.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am confident that my analytical mindset, technical skills, and ability to work independently make me a strong fit for this role. I have attached my CV for your review and look forward to the opportunity to discuss how I can contribute to Convact's growth.

Sincerely,

Md Shahanur Islam Shagor
