I am writing to apply for the Amazon E-Commerce Manager position at ARNOWA GmbH. Your focus on combining marketplace operations with automation and AI aligns with how I approach building and improving systems.

My professional experience includes developing full-stack web applications where I handled product data management, API integrations, and workflow automation. I have built systems that process structured data, handle bulk uploads, and maintain data integrity across multiple platforms. This background gives me a practical understanding of how product information flows through digital marketplaces.

What stands out to me about this role is the emphasis on using AI tools to make processes more efficient. I have worked on projects that integrate AI assistants and automate repetitive tasks, and I am comfortable exploring new tools to solve operational challenges. I approach problems systematically and enjoy finding ways to reduce manual effort through technology.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my experience can contribute to ARNOWA’s continued growth on Amazon PAN-EU.

Sincerely,

Md Shahanur Islam Shagor
