I am writing to apply for the Werkstudent (m/w/d) position in E-Commerce, Produktmanagement & Softwareentwicklung at SpielundLern GmbH. Your focus on building a digital platform for educational and therapeutic materials in the B2B space is something I find genuinely interesting, as it combines practical software development with meaningful impact on children's development.

With professional experience in full-stack web development using PHP, JavaScript, TypeScript, and HTML/CSS, I am well positioned to contribute to the development of features and microservices for your online shop. I have built and integrated RESTful APIs, implemented secure authentication and role-based access control, and created responsive, user-friendly interfaces using modern frameworks like Laravel and Next.js.

In my previous work as a Web Developer, I regularly gathered feedback from stakeholders, analyzed requirements, and worked with business teams to prioritize and implement new features. This experience directly aligns with your need for someone who can bridge customer requirements, product management, and software development. I am comfortable communicating technical topics clearly and enjoy the iterative process of improving solutions based on real user feedback.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how I can contribute to your team.

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
