I am writing to apply for the IT- und E-Commerce-Allrounder position at Green TC GmbH. Your focus on combining e-commerce operations with practical automation and AI tools matches my own approach to building and maintaining systems that work reliably in real business environments.

My professional experience spans full-stack web development, API integration, and system configuration. I have worked extensively with Laravel, Next.js, Node.js, and MySQL to build scalable applications, and I regularly use AI tools to automate repetitive tasks and connect different systems. I am comfortable setting up and maintaining servers, configuring networks, and troubleshooting hardware and software issues as part of daily operations.

One area that particularly interests me is building and managing integrations between e-commerce platforms, ERP systems, and logistics providers. In previous work, I developed RESTful APIs and real-time data pipelines that connected frontend applications with backend services and third-party tools. I have also deployed and maintained applications on Linux servers using Docker, Nginx, and CI/CD pipelines, ensuring uptime and performance.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am confident I can contribute to your team from day one and would welcome the chance to discuss how my background fits your needs. I have attached my CV for your review.

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
