I am writing to apply for the Senior Fullstack Developer (m/w/d) position at QualityMinds GmbH. Your focus on quality-driven development, self-organized teams, and modern KI-gestˆ…tzter software engineering aligns well with my background in full-stack development and AI integration.

My professional experience spans full-stack web application development using React, Next.js, TypeScript, and Laravel. I have built and maintained RESTful APIs, worked with relational databases like MySQL and PostgreSQL, and implemented authentication, role-based access control, and payment integrations. I also have practical experience integrating AI services through APIs, which matches your interest in leveraging KI-Tools to enhance development workflows.

In previous roles, I delivered features end-to-end, from frontend UI implementation to backend API design and database optimization. I have worked on real-time features using WebSockets, optimized application performance through query tuning and caching strategies, and deployed applications on Linux servers using Docker and CI/CD pipelines. I follow clean code practices, participate in code reviews, and document solutions thoroughly.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the opportunity to discuss how my full-stack development experience and interest in AI-driven software engineering can contribute to QualityMinds GmbH.

Thank you for your time and consideration.

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
