I am writing to apply for the Care Coordinator & Administrator role at Ortus Health. Your work providing remote medical coding, pharmacy, and GP triage services to NHS GP practices is an essential service, and I am interested in contributing to a team that supports healthcare operations efficiently.

Through my experience as a full-stack developer and system administrator, I have developed strong organizational and coordination skills. I am accustomed to managing multiple tasks, tracking progress, and ensuring that workflows run smoothlyâ whether that involves coordinating with developers, managing deployment pipelines, or maintaining server health. These skills translate naturally into the administrative and coordination responsibilities of this role.

In previous roles, I have been responsible for documenting processes, communicating clearly with stakeholders, and ensuring that projects stay on schedule. I am comfortable working remotely, managing priorities independently, and collaborating across teams to meet shared goals. I value clarity, reliability, and attention to detail in every task I take on.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my background in coordination, administration, and technical operations can support the Ortus Health team.

Sincerely,

Md Shahanur Islam Shagor
