I am writing to apply for the Entry Level Administrative Assistant position at RecruitLytixs Hires. This role offers a strong foundation in administrative support and digital operations, and I am interested in contributing to your team while building practical skills in data management and workflow organization.

Through my background in software engineering, I have developed strong computer skills, attention to detail, and the ability to follow structured workflows. I am comfortable working with spreadsheets, organizing digital files, and maintaining accurate records across systems. I am also experienced in identifying and flagging inconsistencies in data, which aligns with the responsibilities of this role.

I have worked remotely for several years, managing my own tasks and coordinating with teams across different time zones. I am self-motivated, organized, and capable of handling repetitive tasks with consistency. I am also eager to learn new tools and processes as part of structured onboarding and training.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how I can support your team.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
