I am writing to apply for the Head of Content role at OnTheGoSystems. Your approach to content as a hands-on, results-driven function that combines AI workflows with human ownership aligns with how I work.

What stands out to me about OnTheGoSystems is that you build products that solve real translation and localization problems for over 1.5 million websites. Your emphasis on starting by doing the work, earning influence through output, and then shaping strategy from there matches my own working style.

Through my professional experience in product IT companies, I have built AI-assisted workflows that go beyond simple prompting. In one project, I integrated OpenAI and Replicate APIs to create intelligent assistants that handled research, drafting, and image processing. I also implemented validation steps to review AI-generated content for accuracy before publishing. This taught me how to balance speed with quality control.

I am comfortable owning content end-to-end, from research and production to analysis and iteration. I have worked closely with product, support, and engineering teams to turn customer problems into useful content and features. I use analytics, user feedback, and SEO considerations to guide decisions, and I am always experimenting with processes to improve efficiency.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how I can contribute to OnTheGoSystems.

Sincerely,

Md Shahanur Islam Shagor
