I am writing to apply for the Pharmacovigilance Associate position at Puma Biotechnology, Inc. I understand this role requires strong analytical thinking, attention to detail, and a commitment to data integrity and compliance. While my professional background is in software engineering, I bring a structured, quality-oriented approach to handling complex information that aligns well with pharmacovigilance operations.

Through my work as a full-stack developer, I have built and maintained systems that require precise data handling, reconciliation, and workflow monitoring. I have experience working with databases, ensuring data accuracy, and following strict procedures to maintain data integrity. These skills translate directly to the case processing, quality control, and safety database activities described in this role.

In previous professional experience, I have collaborated cross-functionally with teams to resolve data discrepancies, document decisions, and maintain inspection-ready records. I am comfortable working in high-volume environments where meeting timelines and maintaining accuracy are equally important. My ability to follow procedures carefully and communicate clearly has been essential in delivering reliable results.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. Thank you for considering my application.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
