I am writing to apply for the (Junior) ProduktmanagerIn B2C Commodity & Customer Experience position at BELKAW GmbH. The opportunity to shape energy products from both a system and customer perspective, while making complex topics understandable, is exactly the kind of challenge I find meaningful.

Through my work as a Web Developer, I have built and maintained digital platforms where clear communication and user experience were central. I have experience managing content on websites, creating FAQs and informational materials, and ensuring that technical information is presented in a way that is accessible to end users. This has given me a strong foundation in customer-oriented communication and digital content management.

One area that particularly interests me is the translation of complex product and pricing logic into straightforward customer-facing content. In my previous roles, I worked on projects that required me to simplify technical details for non-technical audiences, whether through website copy, support documentation, or user guides. I am comfortable working with CMS platforms and digital tools to maintain consistency across all customer touchpoints.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my skills can contribute to BELKAW’s mission of making energy understandable.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
