I am writing to apply for the Mitarbeiter Operatorenzentrale / Sachbearbeitung position at AVS Services GmbH. Your company's role in managing traffic safety and digital traffic systems on Germany's highways and urban networks is impressive, and I am interested in contributing to your operations team.

Through my professional experience as a Web Developer, I have developed strong technical and computer skills that align well with the requirements of this role. I have worked extensively with web-based portals and monitoring systems, giving me the technical understanding needed to oversee and verify digital traffic control systems as described in the job responsibilities.

In previous roles, I handled technical support, responded to inquiries, and identified issues from user calls and system data. This experience directly maps to the responsibilities of managing a technical hotline, processing external and internal requests, and recognizing tasks that need escalation. I am comfortable working with Office 365 and various web-based tools.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. Thank you for considering my application.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
