I am writing to apply for the Microsoft 365 / Azure Administrator position at Eichhorn & Grundmann Vertriebs GmbH. Your focus on driving digital transformation in a family-owned company that has been a leading POS service provider for over 50 years is genuinely interesting. The opportunity to actively shape your Microsoft cloud platform while working in a hybrid environment aligns well with my experience.

Through my professional experience, I have developed a strong foundation in cloud infrastructure and system administration. I have worked extensively with Linux servers, Docker containers, Nginx, Apache, and CI/CD pipelines to deploy and maintain production applications on AWS and Google Cloud. This has given me practical understanding of managing identities, roles, security groups, and ensuring stable, secure system operations.

One area that particularly interests me is process automation. In my previous work, I have automated deployment workflows and monitoring processes to improve operational efficiency and system reliability. I am comfortable analyzing disruptions, maintaining oversight, and ensuring stable operations. My experience with cloud environments and security practices provides a solid base for developing security and compliance policies.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my background can contribute to your team.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
