I am writing to apply for the Head of Paid Search & AI Advertising role at hurra.com. The combination of AI, automation, and search advertising that you are building is exactly the kind of challenge I want to work on next.

My technical background is rooted in AI engineering and full-stack development. I have built AI-powered applications using OpenAI APIs, integrated automation pipelines, and developed platforms that handle real-time data processing and user interactions. I approach new AI capabilities with a practical mindset: evaluate, test, and turn them into scalable solutions that deliver measurable results.

One area that particularly interests me is how AI is reshaping search and advertising workflows. Through my project work, I have integrated third-party APIs, built role-based access systems, and deployed applications on cloud infrastructure using Docker, Nginx, and CI/CD pipelines. I am comfortable working across the stack and translating strategic goals into technical execution.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and look forward to the opportunity to discuss how I can contribute to hurra.com.

Sincerely,

Md Shahanur Islam Shagor
