I am writing to apply for the Full-Stack Developer role at Joy_. Your vision of a Universal Purchasing Infrastructure that makes every product on the internet instantly available is genuinely ambitious, and the way you are applying it to reinvent the gift card market in Germany is exactly the kind of product challenge I want to work on.

My background is in full-stack development with TypeScript, React, Next.js, and PostgreSQL. Over the past 4 years, I have built and shipped production web applications end to end, covering everything from database design and API architecture to responsive frontend interfaces and deployment. I have experience with Vue.js and am comfortable working across the entire stack, which aligns well with your core application development needs.

In my professional experience, I have owned features from discovery through production. At Explo-IT, I designed and developed scalable web applications using Laravel and Next.js, built and integrated RESTful APIs, implemented authentication and role-based access control, and optimized database performance through query tuning and caching strategies. I also deployed and maintained applications on Linux servers using Docker and Nginx, and delivered real-time features using WebSockets.

One project that reflects how I work is a full-stack travel agency platform I built for 2Expedition. I designed the PostgreSQL schema, built the API layer with NestJS and TypeScript, and created a responsive, multi-language, multi-currency UI using Next.js and Tailwind CSS. The platform handles tours, bookings, customer data, and regional support. I deployed the frontend on AWS Amplify and the backend on AWS EC2, and I monitored performance to ensure reliability.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the chance to discuss how I can contribute to building the gift card product at Joy_.

Sincerely,

Md Shahanur Islam Shagor
