I am writing to apply for the Werkstudent:in Quality Assurance â Grafik & Content position at Stacvalley. Your work helping brands like Clatronic, RedBull, and Purelei scale on Amazon is impressive, and I appreciate the emphasis on quality in a high-volume production environment.

I have a technical background in full-stack development and a strong understanding of design tools like Figma. This combination allows me to review graphical outputs such as listings, A+ Content, and brand stores with precision. I can identify even small deviations from briefs and style guides and document them clearly.

In my professional experience as a Web Developer, I worked closely with design and content teams to ensure UI accuracy and brand consistency across projects. I am comfortable giving structured feedback and collaborating with account management and creative teams to maintain quality standards.

I am currently pursuing a Bachelor of Science in Software Engineering, which gives me a structured approach to problem-solving and process improvement. I am available for at least 80 hours per month and can work fully remotely with flexible scheduling.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how I can contribute to your QA processes.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
