I am writing to apply for the Werkstudent Marketing-Kommunikation / Content-Management position at Labtagon GmbH. As a Software Engineering student with practical experience in full-stack development and content management, I am drawn to the opportunity to shape communication strategies in a growing IT company.

Through my work building web applications with Laravel, Next.js, and Strapi, I have developed a strong understanding of how content flows through digital platforms. I have managed content structures, built editorial interfaces, and ensured that technical information is presented clearly to end users. This background gives me a practical perspective on content management systems and the importance of structured, user-friendly communication.

One area that particularly interests me is creating content that bridges the gap between technical complexity and audience understanding. In previous projects, I have written documentation, structured blog content, and collaborated with teams to maintain consistent messaging across web and social channels. I am comfortable working with CMS tools, planning editorial calendars, and analyzing content performance to guide improvements.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the chance to discuss how I can contribute to the Labtagon marketing team.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
