I am writing to express my interest in the SAP IS-U Consultant role at Pertemps ERP. Although my core expertise lies in full-stack and AI engineering, I bring strong software engineering fundamentals, project delivery experience, and a structured approach to problem-solving that can add value in enterprise consulting environments.

Through my professional experience as a Web Developer, I have designed and built scalable web applications using Laravel, Next.js, and Node.js, with a focus on clean architecture, secure authentication, and database optimization. I have worked extensively with MySQL and PostgreSQL, implemented RESTful APIs, and deployed applications on Linux servers using Docker and Nginx. These skills in building reliable, maintainable systems are directly applicable to the technical demands of SAP IS-U consulting.

One area that particularly interests me is the energy and utilities sector. The opportunity to work with leading consulting firms on SAP IS-U projects, including billing, device management, EDM, and smart metering, aligns with my interest in building systems that handle complex operational logic and large-scale data processing.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. Thank you for considering my application.

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
