I am writing to apply for the Social Content Designer & Producer position at Josie Maran. Your brand's focus on clean, natural beauty and creating engaging social content aligns with my interest in building visually compelling digital experiences.

Through my work as a full-stack developer, I have developed a strong eye for design and user experience. I regularly use tools like Figma to create layouts and prototypes, and I implement responsive, polished interfaces using React, Next.js, and Tailwind CSS. This combination of design thinking and technical execution allows me to produce content that is both visually appealing and technically sound.

One area that particularly interests me is producing content that resonates with audiences across different platforms. In previous projects, I have built complete frontend systems from scratch, ensuring that every visual element, interaction, and layout is intentional and optimized for engagement. I understand how to balance creative direction with practical constraints like load times, accessibility, and cross-device consistency.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my background can support Josie Maran's social content goals.

Thank you for your time and consideration.

Sincerely,

Md Shahanur Islam Shagor
