I am writing to apply for the Recruiter position at Pavago. While my professional background is in software engineering, I bring strong communication skills, cross-cultural experience, and a structured approach to managing relationships and workflows that are directly relevant to this role.

Over the past four years, I have worked remotely with teams and clients across Bangladesh, Russia, and the United States. This experience has taught me how to communicate clearly across time zones, adapt to different working styles, and build trust with people from diverse backgrounds. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and am comfortable operating in international environments.

In my previous roles, I regularly coordinated with stakeholders, managed project timelines, and ensured that technical and non-technical teams stayed aligned. These responsibilities required strong organizational skills, attention to detail, and the ability to handle multiple priorities without losing focus. I approach every interaction with professionalism and a genuine interest in understanding people's needs.

I am a quick learner and a problem solver by nature. I enjoy working in environments where clear communication, reliability, and a proactive mindset are valued. I am confident that my ability to build relationships and manage processes effectively would allow me to contribute meaningfully to your recruitment team.

I have attached my CV for your review. Thank you for considering my application.

Sincerely,

Md Shahanur Islam Shagor
