I am writing to apply for the Business Development Representative role at Zyte. Your company's mission to help customers extract and utilize web data at scale is impressive, and I am drawn to the challenge of connecting technical solutions with business needs in a globally distributed team.

My background is in software engineering, with a focus on full-stack development and AI-powered systems. Over the past four years, I have built and deployed web applications, integrated APIs, and worked on automation projects that required clear communication between technical and non-technical stakeholders. This experience has given me a strong ability to understand complex products and explain their value in practical terms.

In my previous work as a Web Developer, I collaborated closely with clients and team members to translate requirements into working solutions. I learned how to listen carefully, ask the right questions, and present technical concepts in a way that makes sense to people without a technical background. These skills are directly relevant to understanding customer needs and articulating how Zyte's data solutions can address them.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my background can contribute to Zyte's growth.

Thank you for your time and consideration.

Sincerely,

Md Shahanur Islam Shagor
