I am writing to apply for the Industrial Operatives position at Denholm Energy Services. Your company's role in the energy sector is well-regarded, and I am interested in contributing to your operations.

Through my work in software engineering and hardware integration, I have developed a practical, hands-on approach to solving technical problems. I have experience working with embedded systems such as Raspberry Pi, ESP32, and NVIDIA Jetson Nano, which has given me a solid understanding of hardware-software interaction, system reliability, and structured troubleshooting.

In previous roles, I have worked both independently and as part of a team, consistently delivering results on time and following clear processes. I am comfortable in environments that require attention to detail, adherence to safety protocols, and the ability to adapt quickly to new tools or workflows.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the opportunity to discuss how my skills and work ethic can contribute to the Denholm Energy Services team.

Sincerely,

Md Shahanur Islam Shagor
