I am writing to express my interest in the MTM II position at Integer Holdings Corporation. I understand that Integer values innovation, collaboration, and integrity, and I appreciate the company's commitment to creating better solutions and fostering an inclusive culture.

My background is in full-stack web development and AI engineering, with hands-on experience building scalable applications using Laravel, Next.js, React, and Node.js. I have developed RESTful APIs, implemented authentication and role-based access control, and integrated payment gateways. I also work with databases like MySQL and PostgreSQL, and I am comfortable with deployment tools such as Docker, Nginx, and AWS.

In my previous work as a Web Developer, I delivered end-to-end features including real-time communication, server monitoring dashboards, and multi-vendor e-commerce platforms. I focus on writing clean, maintainable code and ensuring applications perform well under real-world conditions.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. Thank you for considering my application.

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
