I am writing to apply for the Junior Director position at Newhouse. While my professional background is in software engineering and AI, I bring a strong foundation in cross-functional collaboration, clear communication, and meticulous attention to detail that aligns well with the responsibilities outlined in this role.

In my experience as a Web Developer at Explo-IT and DataSoft LTD., I worked closely with diverse teams including product managers, designers, and senior engineers to deliver scalable web applications. This required coordinating across different perspectives, managing competing priorities, and ensuring every feature met quality standards before release. I built dashboards, reporting systems, and real-time monitoring tools that demanded precision and reliability.

One area that particularly interests me is the emphasis on building relationships and identifying key partners for campaigns. In my development work, I regularly integrated third-party services such as payment gateways, cloud storage, and authentication providers. Each integration required careful evaluation, clear rationale, and ongoing coordination with external vendors. This experience translates well into managing influencer outreach and contract negotiations.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my background can contribute to Newhouse’s creative and communications work.

Sincerely,

Md Shahanur Islam Shagor
