I am writing to express my interest in future corporate positions at Weedmaps. As a Full-Stack & AI Engineer with experience building scalable web applications and intelligent systems, I would welcome the opportunity to contribute to your team as the company continues to grow and expand into new markets.

My technical foundation is in full-stack development, where I have worked extensively with Laravel, Next.js, React, TypeScript, and Node.js to build production-grade applications. I have designed and integrated RESTful APIs, implemented authentication and role-based access control, and optimized database performance using MySQL, PostgreSQL, and Redis. My work also includes real-time features using WebSockets and Socket.IO, as well as deployment on Linux servers with Docker, Nginx, and CI/CD pipelines.

In my professional experience as a Web Developer at Explo-IT, I delivered scalable web applications and collaborated closely with stakeholders to translate requirements into working software. I built responsive, SEO-friendly interfaces with Next.js and Tailwind CSS, integrated payment gateways, and maintained applications on cloud infrastructure. Earlier, at DataSoft LTD, I contributed to Laravel-based projects, assisted with API development, and supported frontend implementation.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would be glad to discuss how my background could align with future needs at Weedmaps. Thank you for your time and consideration.

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
