I am writing to apply for the Image Annotation Data Entry â Fresher position at Smart IT Frame LLC. The opportunity to contribute to training AI and machine learning models through careful image labeling and classification aligns well with my technical background and attention to detail.

Through my project work on the Wireless Vision-Aid for the Blind (WVAB), I gained direct experience with image classification and object detection pipelines. I worked with YOLOv8n, the COCO dataset, and Python to build a system that identifies and categorizes objects in real time. This required precise labeling, consistent tagging, and an understanding of how data quality affects model accuracy.

I am comfortable working with large sets of visual data and maintaining focus during repetitive tasks. My experience with Python and computer vision tools means I can quickly adapt to annotation platforms and workflows. I also understand the importance of following guidelines strictly to ensure consistent, high-quality training data.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how I can contribute to your team.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
