I am writing to apply for the Scrum Master position at SIRITECH SOLUTIONS CORP. The opportunity to facilitate Agile delivery in a 100% remote environment aligns with my experience working across distributed teams and managing project workflows.

Through my professional experience as a Web Developer, I have worked closely with engineering teams to plan sprints, track progress, and ensure timely delivery of features. I have used Jira to manage tasks, coordinate with stakeholders, and maintain clear visibility into project status. While my primary role has been technical, I have consistently taken responsibility for team coordination, communication, and removing blockers.

One area that particularly interests me is the emphasis on SAFe Agile in this role. I understand the importance of aligning team-level sprints with broader program goals, and I am comfortable facilitating ceremonies such as daily stand-ups, sprint planning, reviews, and retrospectives. I focus on creating an environment where teams can work efficiently and continuously improve.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my background in Agile delivery and team coordination can contribute to SIRITECH SOLUTIONS CORP.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
