I am writing to apply for the Document Specialist role at CapitexAI. The position aligns with my experience in building structured, data-driven systems and my ability to work methodically within operations-focused environments.

Through my work as a full-stack developer, I have developed strong skills in managing data, automating workflows, and ensuring accuracy across systems. I have worked extensively with databases such as MySQL and PostgreSQL, and I am comfortable handling document-related processes, data validation, and maintaining organized records.

One area that particularly interests me is the opportunity to contribute to a structured operations environment. My experience building real-time monitoring dashboards and multi-user platforms has taught me the importance of precision, consistency, and clear documentation in every task.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and welcome the opportunity to discuss how my background can support CapitexAI’s operations team.

Thank you for your time and consideration.

Sincerely,

Md Shahanur Islam Shagor
