I am writing to apply for the Operations Coordinator position at CapitexAI. Your focus on structured operations and document management aligns with my experience building and maintaining organized systems that require precision, reliability, and clear workflows.

Through my work as a full-stack developer, I have developed strong skills in managing data pipelines, coordinating between different system components, and ensuring that processes run smoothly. I have built real-time monitoring dashboards and multi-user platforms where accuracy and consistency are critical. These experiences have given me a practical understanding of how structured operations support larger business goals.

One area that particularly interests me is the intersection of technology and operational efficiency. In previous projects, I have designed systems that automate repetitive tasks, track document flows, and provide clear visibility into ongoing processes. I am comfortable working with databases, APIs, and server infrastructure to ensure that operations remain stable and well-documented.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my background in structured systems and operations can contribute to the CapitexAI team.

Sincerely,

Md Shahanur Islam Shagor
