I am writing to apply for the Technischer Property Manager / Bauleiter (w/m/d) Wohnimmobilien position at Trigon Gruppe GmbH. Your company's established presence in Berlin's real estate market, managing a substantial portfolio of residential and commercial properties, is impressive. I am interested in contributing to the technical management and maintenance of your properties.

While my professional background is in software engineering, the core competencies required for this roleâ structured project coordination, data management, budget oversight, and systematic reportingâ are directly transferable. In my work as a Web Developer, I was responsible for planning, coordinating, and implementing technical features, managing project timelines, and ensuring quality control. I regularly created and reviewed technical specifications, monitored progress against budgets, and maintained accurate documentation.

One area that particularly interests me is the coordination of maintenance and repair measures. In my previous experience, I have overseen the full lifecycle of technical projects, from initial planning and resource allocation to execution and final review. This involved working with various stakeholders, tracking progress, and ensuring that all work met required standards and was completed within budget. I am confident I can apply this structured approach to managing building maintenance and service contracts.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my skills in project coordination, data management, and systematic problem-solving can benefit Trigon Gruppe GmbH. Thank you for your consideration.

Sincerely,

Md Shahanur Islam Shagor
