I am writing to apply for the Leiter Finanzbuchhaltung / Rechnungswesen position at Trigon Gruppe GmbH. While my professional background is in software engineering, I have developed systems that directly address the digitalization and process optimization needs mentioned in your job description.

Through my work as a full-stack developer, I have built financial applications that automate complex workflows, manage user data securely, and generate detailed reports. For example, I developed an AI-powered financial platform that handles authentication, data processing, PDF generation, and automated email delivery. This required designing scalable backend architectures and integrating multiple third-party services.

I also created a personal finance management platform with features including transaction tracking, budgeting, savings monitoring, and real-time reporting. The system uses a modular architecture with server-side authentication, role-based admin controls, and live data updates. These projects demonstrate my ability to build systems that improve financial process efficiency and data accuracy.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my experience in building financial systems and digitalizing workflows could contribute to Trigon Gruppe GmbH.

Sincerely,

Md Shahanur Islam Shagor
