I am writing to apply for the Technischer Objektmanager - Bau & Instandhaltung position at Trigon Gruppe GmbH. Your company's established presence in Berlin's real estate market, managing a substantial portfolio of residential and commercial properties, is impressive. I am drawn to the responsibility of coordinating maintenance projects and ensuring the long-term quality of building assets.

My professional background is in software engineering, where I have spent over four years building and maintaining complex systems. This experience has given me a structured, analytical approach to project coordination, data management, and process optimization. I am accustomed to working with detailed specifications, tracking progress against budgets, and ensuring that deliverables meet quality standards.

In my previous roles, I was responsible for planning, coordinating, and delivering technical projects from start to finish. I maintained and updated structured data systems, monitored project budgets, and ensured timely communication with stakeholders. These responsibilities align closely with the tasks outlined for this position, including the coordination of maintenance measures, updating inventory data, and monitoring project realization.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments. I am currently based in Russia and am prepared to relocate to Berlin for this opportunity.

I have attached my CV for your review. I would welcome the opportunity to discuss how my project coordination and technical skills can contribute to the Trigon Gruppe team.

Sincerely,

Md Shahanur Islam Shagor
