I am writing to apply for the Pflichtpraktikum Social Media Management/Strategie position at Kurverwaltungsgesellschaft mbH Waldbronn. As a Software Engineering student with practical experience in building and managing digital platforms, I am interested in contributing to the development of your social media presence at Albtherme Waldbronn.

Through my project work, I have developed a structured approach to content planning and digital communication. While building the Travel Agency App, I implemented multi-language and multi-currency support, managed content workflows, and created user-friendly interfaces. These experiences have given me a practical understanding of how to organize, present, and adapt content for different audiences.

What draws me to this internship is the opportunity to work on real social media strategy from the ground up. I am comfortable with creative ideation, content creation, and performance tracking. I work independently, take initiative, and am eager to bring my organizational skills and interest in digital trends to support your team in planning posts, managing community interactions, and evaluating campaign results.

In addition to my technical background, I communicate clearly across teams and am fluent in Bengali and English, with working knowledge of Russian and Hindi. I enjoy collaborating in international environments and am motivated to contribute actively from day one.

I have attached my CV for your review and would welcome the chance to discuss how I can support your social media goals during my mandatory internship.

Sincerely,

Md Shahanur Islam Shagor
