I am writing to apply for the Senior Digital Marketing Specialist â SEO, Leadgenerierung & KI position at Sirius Facilities GmbH. While my professional background is rooted in software engineering, I bring a combination of technical web development skills and practical experience with AI-driven solutions that directly support the responsibilities outlined in your job description.

Through my work as a Web Developer, I have gained strong technical understanding of website structure, performance optimization, and tracking implementation. I have built and maintained web applications using modern frameworks and deployed them on Linux servers with Nginx and Docker. This experience gives me a practical grasp of how technical SEO, page speed, and site architecture influence user behavior and conversion rates.

One area that particularly interests me is the use of AI tools to optimize workflows and processes. I have integrated AI assistants and machine learning models into production applications, including object detection systems and natural language processing features. This hands-on experience with AI-powered solutions aligns well with your requirement for using KI-Tools to improve lead generation and content optimization.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my technical background and AI experience can contribute to your team at Sirius Facilities GmbH.

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
