I am writing to apply for the Head of Mergers and Acquisitions - Buy and Build position at Options Group. While my professional background is in software engineering and AI, I bring a structured, entrepreneurial approach to complex projects and a track record of taking full ownership from concept to delivery.

Through my work as a Web Developer, I have led the end-to-end development of scalable platforms, coordinated with stakeholders and external partners, and ensured that technical execution aligns with strategic business objectives. I am accustomed to working autonomously, managing competing priorities, and driving results in environments that require both hands-on involvement and high-level coordination.

One area that particularly interests me is the combination of strategic influence and operational proximity described in this role. I have experience bridging technical teams and business stakeholders, translating high-level goals into actionable plans, and maintaining accountability for outcomes. I am comfortable reporting directly to leadership and collaborating across functions to achieve shared objectives.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my background in building and delivering complex systems can contribute to your platform’s growth agenda.

Sincerely,

Md Shahanur Islam Shagor
