I am writing to apply for the Software Architekt:in position at QualityMinds GmbH. Your focus on quality assurance, agile collaboration, and continuous learning aligns well with my own approach to building reliable, maintainable software systems.

Over the past four years, I have worked across the full stack, designing and delivering web applications using Laravel, Next.js, React, and Node.js. My experience includes architecting RESTful APIs, implementing CI/CD pipelines, and deploying applications on Linux servers with Docker and Nginx. I regularly perform code reviews and architecture evaluations to ensure systems remain scalable, performant, and aligned with business goals.

One area that particularly interests me is the collaborative nature of this role. I have experience working directly with clients and cross-functional teams to translate requirements into practical software architectures. I am comfortable taking ownership of technical decisions while keeping communication clear and transparent. I also enjoy mentoring colleagues and contributing to shared knowledge, whether through documentation, pair programming, or internal tech talks.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my background can contribute to QualityMinds GmbH.

Thank you for your time and consideration.

Sincerely,

Md Shahanur Islam Shagor
