I am writing to apply for the Software-Ingenieur PCS7 Elektrotechnik position at KURT Personal GmbH. Your focus on industrial automation and process control systems aligns with my technical background in software engineering and systems development.

Through my academic work in Software Engineering at Voronezh State University, I have developed strong foundations in C++ and Python, which are directly applicable to developing and programming automation solutions. My research has involved working with embedded systems, sensor integration, and real-time data processing, giving me practical experience with industrial communication concepts and system-level programming.

In previous professional roles, I have built and maintained software systems, performed functional testing and debugging, and optimized existing applications for better performance. I am comfortable working with structured development processes, creating technical documentation, and coordinating with project leads and team members to deliver reliable solutions.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my skills can contribute to your team.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
