I am writing to apply for the Assistant Store Manager position at Bershka Deutschland B.V & Co. KG in Stuttgart. The role of connecting people, performance, and processes to drive store success is one I find genuinely compelling.

Although my professional background is in software engineering, my work has consistently involved leading teams, managing complex workflows, and ensuring that strategic goals translate into tangible results. At Explo-IT, I collaborated closely with stakeholders and engineering teams to deliver projects on time while maintaining high standards of quality and communication. This experience has given me a practical understanding of how to align people around shared objectives.

A key part of my role involved coordinating between different team members, prioritizing tasks, and making decisions that kept projects moving forward. I am comfortable taking ownership of processes, supporting team development, and maintaining focus on both operational efficiency and service quality.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am confident I can bring a structured, people-focused approach to your store and contribute to the team’s success. I have attached my CV for your review and welcome the opportunity to discuss how my experience aligns with this role.

Sincerely,

Md Shahanur Islam Shagor
