I am writing to apply for the Social Media Strategist, Creator & Influencer role at OneTwoSocial. Your agency's focus on creative content, authentic storytelling, and entertaining dialogue for major brands like Kaufland and KFC Deutschland is impressive. I am drawn to the opportunity to contribute to campaigns that blend strategy, creativity, and platform understanding.

My professional background is in full-stack software engineering, where I have spent over four years building scalable web applications and platforms. This experience has given me a strong analytical mindset, attention to detail, and the ability to work with data to drive decisions. I am accustomed to defining metrics, analyzing results, and iterating based on concrete learnings, which aligns with the KPI-driven approach described for this role.

In previous work, I have developed platforms that required deep understanding of user flows, authentication systems, and real-time data processing. I have also built and integrated third-party APIs, managed cloud deployments, and optimized system performance. These technical skills would support campaign analysis, reporting, and the use of influencer-marketing tools for data-driven insights.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am confident that my structured, independent work style and ability to translate complex information into clear recommendations would be valuable to your team. I have attached my CV for your review and would welcome the chance to discuss how I can contribute to OneTwoSocial.

Sincerely,

Md Shahanur Islam Shagor
