I am writing to apply for the (Junior) Strategic Sales Consultant - New Business position at trafficdesign GmbH. Your approach to redefining sales through smart funnels, strategic consulting, and genuine client understanding stands out to me. I am drawn to the ownership culture and the focus on building real opportunities rather than following rigid scripts.

Although my professional background is in software engineering, I have consistently worked in client-facing and stakeholder-heavy environments. At Explo-IT, I collaborated directly with stakeholders to understand their needs, translate requirements into technical solutions, and ensure smooth delivery. This required active listening, clear communication, and the ability to build trust with non-technical partners. I am comfortable leading discovery conversations and managing expectations across different teams.

One area that particularly interests me is the strategic side of new business development. In my previous work, I often identified process gaps, proposed improvements, and took ownership of initiatives from start to finish. I enjoy analyzing situations, finding creative ways to move forward, and turning initial interest into concrete outcomes. I am confident I can bring this same drive to your new business pipeline.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the opportunity to discuss how my background and mindset align with the goals of trafficdesign GmbH.

Thank you for your time and consideration.

Sincerely,

Md Shahanur Islam Shagor
