I am writing to apply for the Scrum Master position at Blackstone Talent Group. With a background in software engineering and a strong focus on Agile delivery, I am well prepared to support your teams in delivering value through structured ceremonies, clear communication, and consistent process improvement.

In my professional experience as a web developer, I have worked within Agile teams where I participated in daily standups, sprint planning, and retrospectives. I have used Jira to track tasks, maintain backlogs, and ensure work items are current and accurately reflected. I understand the importance of sprint forecasting, capacity planning, and keeping the team focused on their commitments.

One area where I have consistently contributed is in identifying and escalating impediments early. I have experience coordinating with both technical team members and business stakeholders to resolve blockers and keep delivery on track. I am comfortable facilitating discussions, documenting action items, and following through until issues are resolved.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how I can contribute to your team at Blackstone Talent Group.

Sincerely,

Md Shahanur Islam Shagor
