I am writing to apply for the Assistente Contˆ¡bil position at Sicoob. Your cooperative's mission to connect people for financial justice and prosperity resonates with me, and I am interested in contributing to the back-office operations that support credit products.

Through my work developing financial technology systems, I have built a strong foundation in data reconciliation, financial data processing, and automated reporting. I designed and developed an AI-powered financial application that handles complex data workflows, including reconciliation of financial records, automated PDF term sheet generation, and secure data processing via AWS services. This experience required meticulous attention to detail and a systematic approach to managing financial data.

In previous work, I have developed systems that process transactions, manage user data, and generate financial reports. I am comfortable working with structured data, ensuring accuracy in calculations, and maintaining organized records. My technical background has taught me to approach problems methodically and to verify data integrity at every step.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my analytical skills and attention to detail can support Sicoob's back-office operations.
