I am writing to apply for the Kosmetiker:in position at Medical Skin Center Dr. David Bacman. While my professional background is in software engineering, I bring strong technical skills that directly support the operational and documentation needs of your MEDISPA.

One area where I can contribute immediately is the careful documentation of treatments and management of patient data in practice software. In my previous work as a web developer, I maintained accurate records, managed databases, and ensured data integrity across systems. I am comfortable with PC applications and can quickly adapt to your specific software environment.

I also have experience working within structured workflows and collaborating with teams to ensure smooth daily operations. Whether preparing treatment rooms according to hygiene standards or supporting the scheduling and check-out process, I bring a methodical and reliable approach to every task.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am genuinely interested in the medical-cosmetic field and eager to learn the specific treatments and devices used at your MEDISPA. I have attached my CV for your review and would welcome the opportunity to discuss how I can contribute to your team.

Sincerely,

Md Shahanur Islam Shagor
