I am writing to express my strong interest in the Pflichtpraktikum Online Marketing Manager (m/w/d) role at eFLY Marketplace Services GmbH. With more than four years of professional experience across software engineering and applied AI, I bring a combination of production-grade development skill and research-driven engineering judgment.

My background aligns with this opportunity through full-stack engineering, applied AI, autonomous systems research, secure communications, and maintainable production delivery. I have delivered scalable applications and complete technical systems while keeping architecture, performance, security, and maintainability at the center of the work.

The job description especially connects with my experience in HTML, CSS, Javascript, Typescript. My related work includes including production web applications and research systems across C++20, Go, Python, and modern web stacks, which reflects my ability to move between implementation, research, and real-world constraints.

I work well across teams and disciplines, communicate clearly in English and Bengali, and stay self-directed when solving complex problems. I would welcome the opportunity to contribute to your team and discuss how my background aligns with your goals.

Sincerely,

Md Shahanur Islam Shagor
