I am writing to apply for the Ausbildung zum Elektroniker / zur Elektronikerin fˆ…r Gerˆte und Systeme starting in 2026 at MCF Technologie GmbH. Your work in building custom measurement and test systems for industrial applications is exactly the kind of practical, technology-driven environment where I want to develop my skills.

Through my Software Engineering studies at Voronezh State University, I have gained solid technical understanding and hands-on experience with electronic systems. I have worked extensively with microcontroller platforms such as Raspberry Pi and ESP32, building and testing circuits, wiring components, and integrating sensors. This has given me practical familiarity with reading schematics, assembling electronic assemblies, and troubleshooting hardware issues systematically.

One area that particularly interests me is working with measurement and testing equipment. In my project work on embedded systems, I regularly used multimeters, oscilloscopes, and diagnostic tools to verify circuit behavior and isolate faults. I am comfortable working precisely and methodically, and I enjoy the process of analyzing a problem, narrowing down the cause, and implementing a fix.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am looking for a practical Ausbildung where I can learn directly from experienced professionals while contributing to real customer projects. I am motivated, reliable, and ready to take responsibility from day one. I have attached my CV for your review and look forward to the opportunity to grow with MCF Technologie GmbH.

Sincerely,

Md Shahanur Islam Shagor
