I am writing to apply for the Mitarbeiter in der Unternehmensberatung fˆ…r den privaten Haushalt position at Albig Finanzberatung. Your focus on building a new firm with a client-centered approach and flexible working conditions aligns well with my own work style.

The role involves digital data entry, preparing preliminary evaluations, client support, and client acquisition. While my background is in software engineering, I have developed strong skills in data management, structured documentation, and client communication through my professional experience. I am comfortable working with databases, processing information accurately, and maintaining organized records.

In my previous work as a Web Developer, I regularly handled data entry tasks, maintained client databases, and supported team workflows. I also communicated directly with clients to understand their needs and provide clear updates. These experiences have prepared me to handle the administrative and client-facing responsibilities of this role effectively.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am eager to bring my organizational skills, attention to detail, and client-focused approach to your team. I have attached my CV for your review and look forward to the possibility of contributing to your new firm.

Sincerely,

Md Shahanur Islam Shagor
