I am writing to apply for the Ausbildung zum Mechatroniker / zur Mechatronikerin (m/w/d) starting in 2026 at MCF Technologie GmbH. What draws me to this opportunity is the chance to work hands-on with systems that combine mechanics, electronics, and software, and to contribute to real industrial measurement and testing solutions from the very beginning of my training.

Through my academic work in Software Engineering at Voronezh State University and my practical project experience, I have developed a solid understanding of how electronic components, sensors, and software interact. One project that closely relates to this field is the Wireless Vision-Aid for the Blind (WVAB), where I assembled hardware including a Raspberry Pi and ESP32-CAM, integrated a YOLOv8n-based object detection pipeline, and implemented a real-time UDP streaming protocol. This required me to work with technical schematics, debug hardware-software communication issues, and ensure reliable system operation under real-world conditions.

In addition to my hardware-related work, I have professional experience developing full-stack web applications using Laravel, Next.js, and Node.js, which has strengthened my ability to work systematically, follow technical documentation, and troubleshoot complex systems. I am comfortable with PC tools, have strong analytical skills from mathematics and physics coursework, and approach problems with a structured and reliable mindset.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am motivated to begin my career in mechatronics at MCF Technologie GmbH, where I can learn from experienced professionals and contribute to building custom measurement and testing systems. I have attached my CV and look forward to the opportunity to discuss my application further.

Sincerely,

Md Shahanur Islam Shagor
