I am writing to apply for the (Junior) Finance & Controlling Manager position at pflegori Heimpflege GmbH. Your focus on building transparent financial structures and efficient processes from the ground up aligns with my approach to systems development.

While my professional background is in software engineering, I have consistently worked on projects that require strong analytical thinking, structured problem-solving, and the ability to build systems from scratch. In my previous work as a Web Developer, I designed and developed full-stack applications that involved complex data management, reporting, and process automation. These experiences have given me a solid foundation in data analysis, attention to detail, and the ability to work independently.

One area that particularly interests me is the opportunity to contribute to the development of budgeting, forecasting, and financial analysis processes. My experience building data-driven applications has taught me how to identify patterns, optimize workflows, and create clear, actionable reports. I am confident that my analytical mindset and structured approach will allow me to quickly adapt to the financial controlling environment.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. Thank you for considering my application.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
