I am writing to apply for the Desktop Support Technician position at Pathway Communications. Pathway's long history as a pioneer in IT managed services in Canada, combined with its SOC 2 Type II, PCI, and ISO 27001 certifications, reflects the kind of disciplined and security-conscious environment where I work best.

My technical foundation is built on hands-on experience with Linux, Windows-based systems, and macOS environments. I have diagnosed and resolved hardware, software, and network-related issues, and I am comfortable providing support for desktops, laptops, printers, and mobile devices. I also have experience with remote desktop tools and ticketing systems, and I understand the importance of logging, tracking, and closing tickets accurately while following SLAs.

In previous roles, I set up and configured hardware and software for new employees, maintained and troubleshot AV systems for meetings and conferences, and performed routine hardware maintenance and upgrades. I also created documentation, FAQs, and user guides to help end-users adopt best practices and self-help tools. My approach is methodical: I aim for first-call resolution, track average time to resolve, and prioritize customer satisfaction.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am ready to contribute to Pathway Communications as an on-site Desktop Support Technician and would welcome the opportunity to discuss how my skills align with your team's needs. I have attached my CV for your review.

Sincerely,

Md Shahanur Islam Shagor
